PUBLISHABLE SUMMARY

Ethics is an integral part of research from the beginning to the end and thus the highest priority in EU funded research is given to ethics.

Consequently, for the SUSTAINair project ethics requirements are set out, which project must comply with. These ethics requirements are compiled as deliverable D8.1 (EPQ - Requirement No. 1) in this document.

According to the comments of the ethics reviewers, the following requirements from the Ethics Summary Report are addressed in D8.1 to ensure compliance with ethical principles:

Further information about the possible harm to the environment caused by the research and the measures that will be taken to mitigate the risks must be submitted as a deliverable.

The applicant must demonstrate that appropriate health and safety procedures conforming to relevant local/national guidelines/legislation are followed for staff involved in this project. This must be submitted as a deliverable.

Copies of authorisations for relevant facilities must be kept on file.
